A.Title: High yield purification of active transcription factor IIIA expressed in A.Reference number: S40784; MUID:92066468; PMID:1956778

A.Rote: annotation

A.Rote: an engineered sequence was used to obtain high-yield expression in an E. C.Comment: This zinc-containing protein (7-11 Zn/molecule), which interacts with these genes by RNA polymerase III. It also binds the transcribed 5S RNAs.

C.Comment: Most of the Cys and His residues are ligands for zinc binding.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A;Introns: 40/3; 74/2; 106/3; 136/2; 161/1; 190/1; 266/3; 284/3
